

2024 Seed Starting Calendar

This is the calendar I will be following for my 2024 season and as you will see, I will be starting seeds until the end of July! I really enjoy the seed starting process, watching a small seed emerge into a seedling then on to a thriving plant is fascinating. Let this calendar be a companion on your path to a successful growing season. I'm thrilled to be a part of your seed starting adventure.

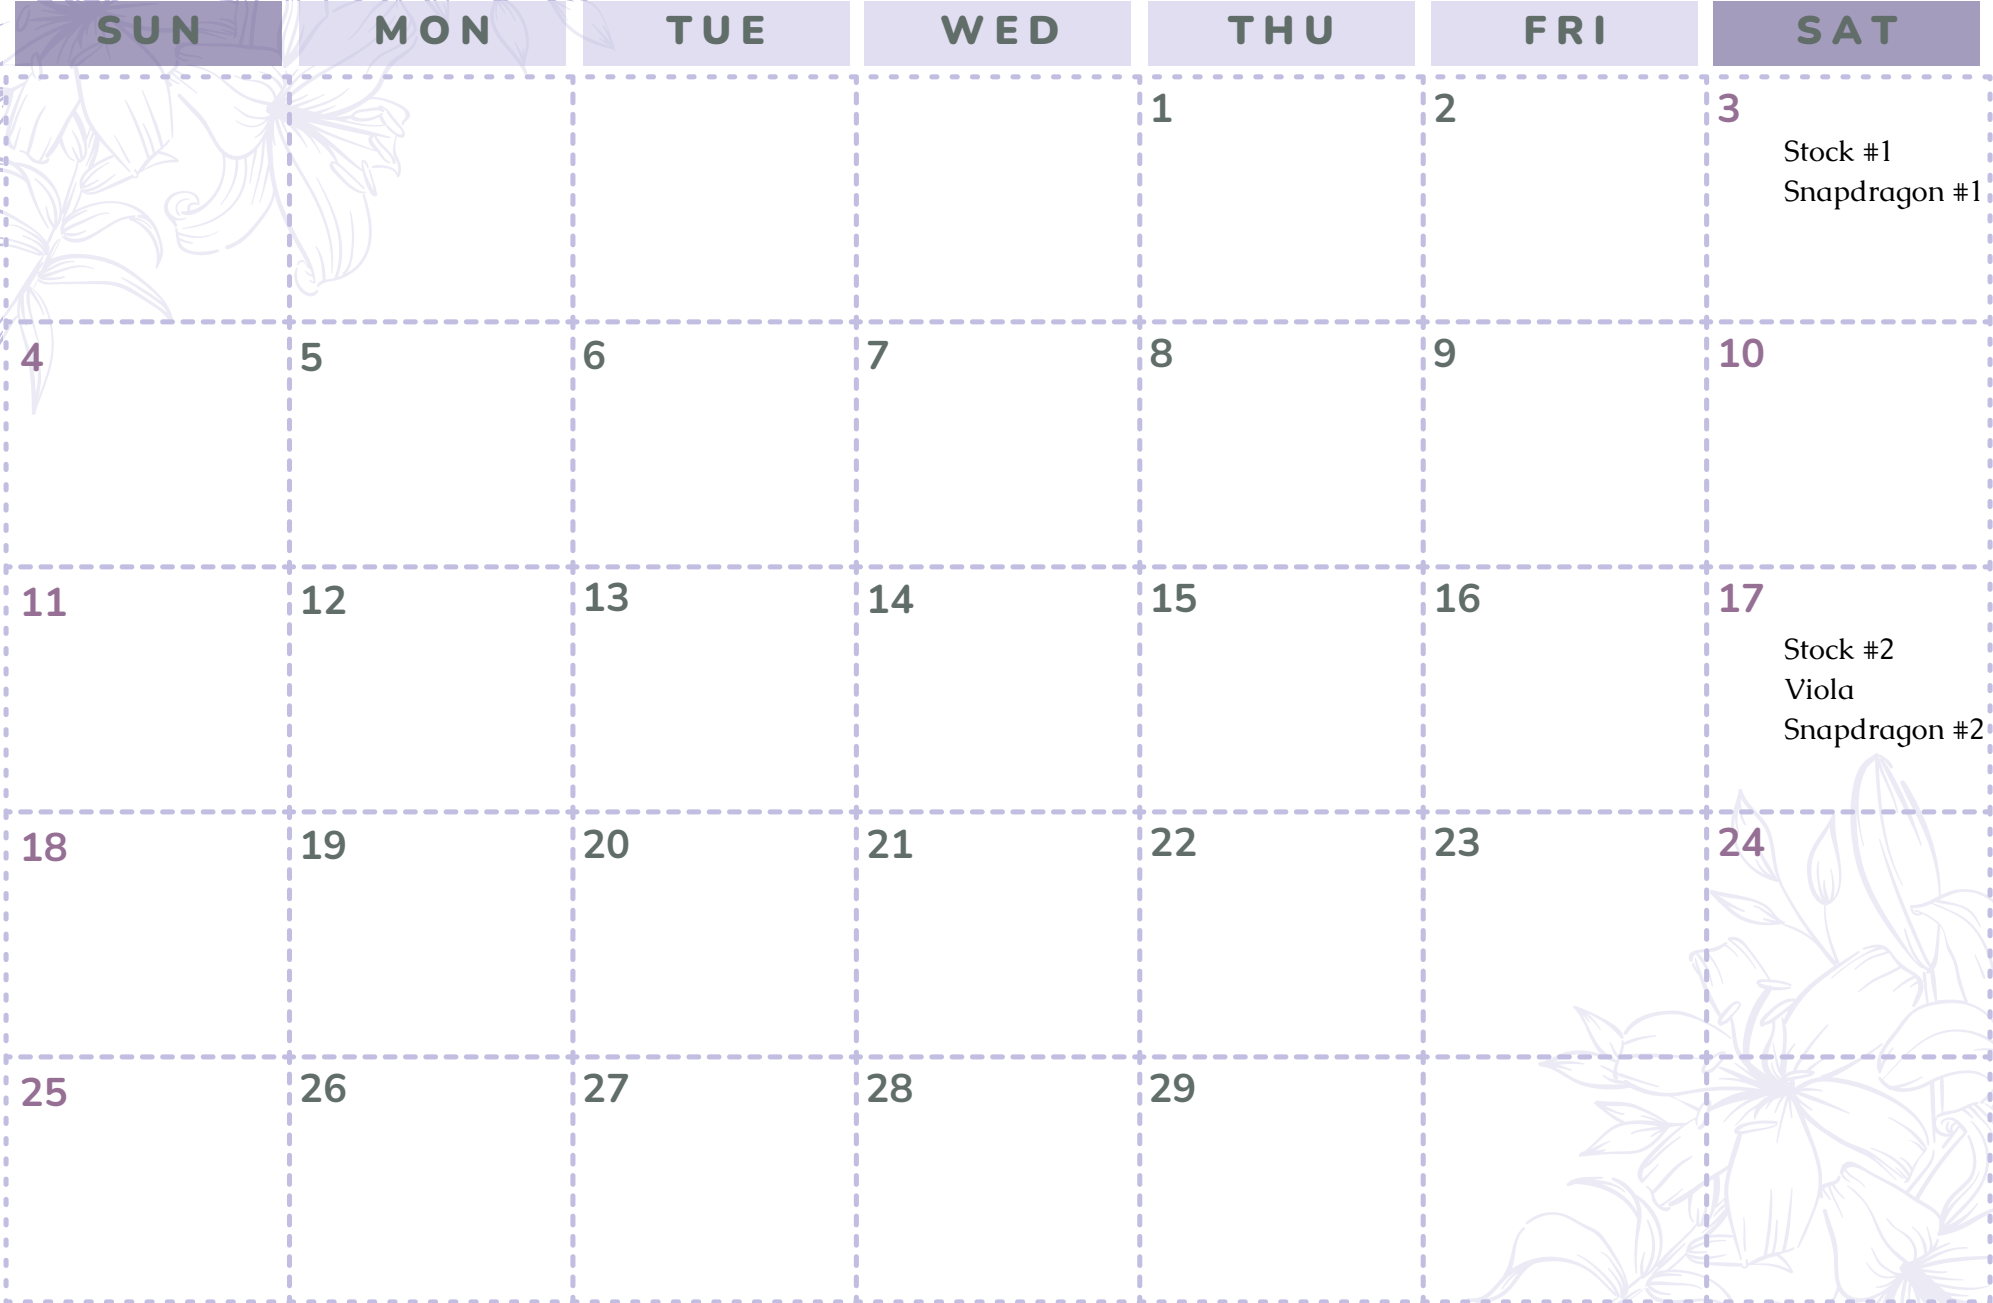

Note: You will see (DS) throughout the calendar which stands for Direct Sow. These seeds will be directly sown outside and will not be started indoors. You will also notice numbers after certain crops which corresponds to the succession number for that crop. Succession planting is simply planting the same crop spaced out over days or weeks to provide blooms over an extended period.
